

SHORAJ GHIMIRE

Java Backend Developer | Spring Boot | REST APIs

shorajghm11@gmail.com | 9823594421 | linkedin.com/in/shoraj-ghimire-b43514314/ | github.com/shorajgoat

SUMMARY

BIT student (4th semester) focused on Java backend development. Built 3 Spring Boot projects covering REST APIs, JWT security, transactions, concurrency, Redis, Kafka, Docker, and testing.

TECHNICAL SKILLS

Languages: Java 17, SQL

Frameworks: Spring Boot, Spring Security, Spring Web, Hibernate/JPA

Databases: PostgreSQL, MySQL, Redis

Tools: Maven, Docker, Docker Compose, Git, GitHub Actions, Flyway

Backend Concepts: JWT, BCrypt, RBAC, REST APIs, @Transactional, idempotency, optimistic locking (@Version), BigDecimal, caching, Kafka, WebSocket/STOMP

Testing: JUnit 5

API Docs: Swagger / OpenAPI

PROJECTS

PayFlow — Digital Wallet & Payment Platform

Java 17 · Spring Boot · PostgreSQL · Redis · Kafka · JWT · JUnit 5 · Docker

- Built wallet, transfer, transaction, authentication, and notification modules using a feature-based modular monolith.
- Implemented atomic transfers with **@Transactional**, idempotency keys, BigDecimal, database constraints, and **@Version** optimistic locking with retry handling.
- Added Redis caching, Kafka events, WebSocket notifications, Flyway migrations, Docker Compose, and JUnit 5 tests.

Uber-style Ride Hailing Backend System — 2026

Java · Spring Boot · Spring Security · JWT · MySQL · Hibernate · Docker · Swagger

- Built 20+ REST endpoints for authentication, ride booking, driver matching, payments, and ratings.
- Implemented JWT + BCrypt security with USER/DRIVER/ADMIN roles and a transactional ride state machine.
- Added nearest-driver matching using the Haversine formula, wallet payments/refunds, Docker deployment, and Swagger API documentation.

Himal Jewellery — Jewellery Shop Management Backend

Java 17 · Spring Boot 3.5.4 · PostgreSQL · Maven · Spring Security · JWT

- Built a feature-based Spring Boot backend for product and user management using repositories and services.
- Implemented BCrypt password hashing and JWT authentication with custom JwtUtil/JwtAuthFilter.
- Developed the project through a structured 71-day backend learning progression.

EDUCATION

Bachelor of Information Technology (BIT) — 2024–Present | Expected 2028

Texas College of Management and IT | Affiliated: Lincoln University of Malaysia | 4th Semester

CERTIFICATIONS

CCNA — Cisco Networking Academy (2025) • Business Training — Nepal Youth Council (2025) • Java Training — Broadway Infosys Nepal (2026)
